## Description

The SKY13321-360LF is a pHEMT GaAs FET I/C switch. The switch may be used in transmit/receive applications by connecting the RF common port (RFC, pin 7) to either the J1 or J2 port (pin 1 or 4, respectively) using a low loss path (i.e., a positive voltage applied to either V1 or V2 pins).

The switch is manufactured in a compact, 2 x 2 mm, 8-pin exposed pad plastic Quad Flat No-Lead (QFN) package.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

**Note:** Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

---

**CAUTION:** Although this device is designed to be as robust as possible, Electrostatic Discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

## Evaluation Board Description

The SKY13321-360LF Evaluation Board is used to test the performance of the SKY13321-360LF SPDT Switch. An assembly drawing for the Evaluation Board is shown in Figure 9.

## Package Dimensions

The PCB layout footprint for the SKY13321-360LF is provided in Figure 10. Typical case markings are shown in Figure 11. Package dimensions for the 4-pin QFN are shown in Figure 12, and tape and reel dimensions are provided in Figure 13.

## Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

THE SKY13321-360LF is rated to Moisture Sensitivity Level 1 (MSL1) at 260  $^{\circ}\text{C}$ . It can be used for lead or lead-free soldering.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

NOTE: A semi-universal Evaluation Board is used to test the SKY13321-360LF. Some RF lines are used to apply DC bias and have 0  $\Omega$  resistors installed. There are two RF bypass capacitors added to the DC control lines. The RF paths -- RFC, J1, and J2 -- have DC blocking capacitors installed.
