

The image displays four distinct electronic components on a white background. In the top center is a black rectangular push button with a silver-colored square actuator. To its left is a potentiometer, featuring a black rectangular body and a prominent white cylindrical knob. In the bottom center is a small black component, likely a micro-switch or a small relay, with a yellow plastic lever and several thin metal pins extending from its base. To the right is a larger black rectangular component, possibly a relay or a multi-pin connector, with a silver-colored rectangular contact area on its top surface and multiple metal pins protruding from the bottom.
